**DETAILED ACTION**

This is in response to the Applicant's response filed on July 24, 2009. Claims 28 - 37, 42 and 43 have been cancelled by the Applicant. Claims 1 – 27, 38, 39 and 44, where Claims 1, 10, 16, 25 and 44 are in independent form, are presented for examination.

***Allowable Subject Matter***

Claims 1 – 27, 38, 39 and 44 are allowed.

The following is an examiner's statement of reasons for allowance: (See also Applicant's Remarks on January 21, 2009.)

Lumelsky (U.S. Patent 6,463,454) discloses a system and method of dynamically managing a distributed system of resources that are associated with distributing content by determining the available capacity for certain resources and replicating those resources to support increased demand for those resources when the existing resources are insufficient meet demand.

Lumelsky (U.S. Patent 6,516,350) discloses a system and method of dynamically managing a distributed system of resources that are associated with distributing content by determining overcapacity conditions for certain resources and replicating those resources to support demand for those resources based upon certain performance criteria.

Forecast (U.S. Patent 6,230,200) discloses a system and method of dynamically modeling a configuration of data handling components in a file server by allocating resources to handle client requests for streaming data based upon scheduling and admissions policies in respect to specific configuration of components within the system.

Douceur (U.S. Patent 7,146,424) discloses a system and method for simultaneously distributing continuous data streams according to a thrifty scheduling policy which examines all available slots within an acceptable range and chooses the slot that minimizes the clustering in the schedule and maximizes the space occupied by each slot within the schedule as determined by a metric that quantifies the degree of clustering.

Regarding Claims 1 and 44, the combination as claimed wherein a capacity planning tool receives configuration information that comprises measurements for a streaming media server's capacity when all clients in a test workload are accessing a single file and when each client in the test workload is accessing a different file is not disclosed, suggested, or rendered obvious by the prior art of record.

Regarding Claim 10, the combination as claimed wherein the service demand is computed based on the equation specified is not disclosed, suggested, or rendered obvious by the prior art of record..

Regarding Claims 16 and 25, the combination as claimed describe a computer system and a computer program product storing instructions for implementing the method claimed in Claim 1.

Regarding Claims 2 – 9, 11 – 15, 17 – 24, 26, 27, 38 and 39, the combination as claimed depend from allowed Claims 1, 10, 16 and 25 and, therefore, are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
